

SPOTLIGHT

INTRODUCING LUMATO

Architectural Linear Fixtures

CT Lighting Sales is excited to introduce their newest line, Lumato. Lumato is based out of Houston, TX and produces linear LED lighting solutions designed to enhance the visual quality of architectural spaces. Lumato focuses on creating their vision of Light Without Boundaries™ through their three key aspects: Quality of light, flexibility and craft. Lumato is able to create a high quality of light through optimal distribution, which provides consistent illumination through a space, while providing a comfortable visual environment through proper direct-indirect illumination.

Lumato divides their product line into three categories: Suspended, Wall and Recessed. Within these categories are form-factors that are the same dimensions across their platform of products, allowing for similar fixture form with different outputs and distributions.

SERIES FORM	W X H (IN)	SUSPENDED	WALL	RECESSED
SQ2	2.5" X 2.5"	YES	YES	
SQ5	5" X 5"	YES		
B25	2.5" X 5"	YES	YES	
PL5N	5" X 2.5"	YES		
PL5W	5" X 2.5"	YES		
PL7W	7.5" X 2.5"	YES		
R3	2.9" LENS			YES

Lumato's fixtures are crafted from an Extruded Aluminum 6063-T5 alloy housing with steel internal components. The suspended fixture features a Sure-Fit alignment system designed to create straighter rows and minimize visual seams, and a Hidden-Connect for hanging cable that recesses into the fixture to allow for a clean finished look. The fixtures are available in a white, silver, or charcoal gray finish (standard) and can be custom painted for select applications.

All Fixtures are available in 3000, 3500, and 4000k and are within a 2.5-step MacAdam Ellipse. They come standard in 80+ CRI and can be custom manufactured with a 90+ CRI option. Each fixture comes with 0-10v dimming standard. Many of the fixtures can reach efficacy of up to 100 LPW, depending on the configuration.
